

ANNOUNCEMENT · FLIGHTCAST × AMAZON MUSIC

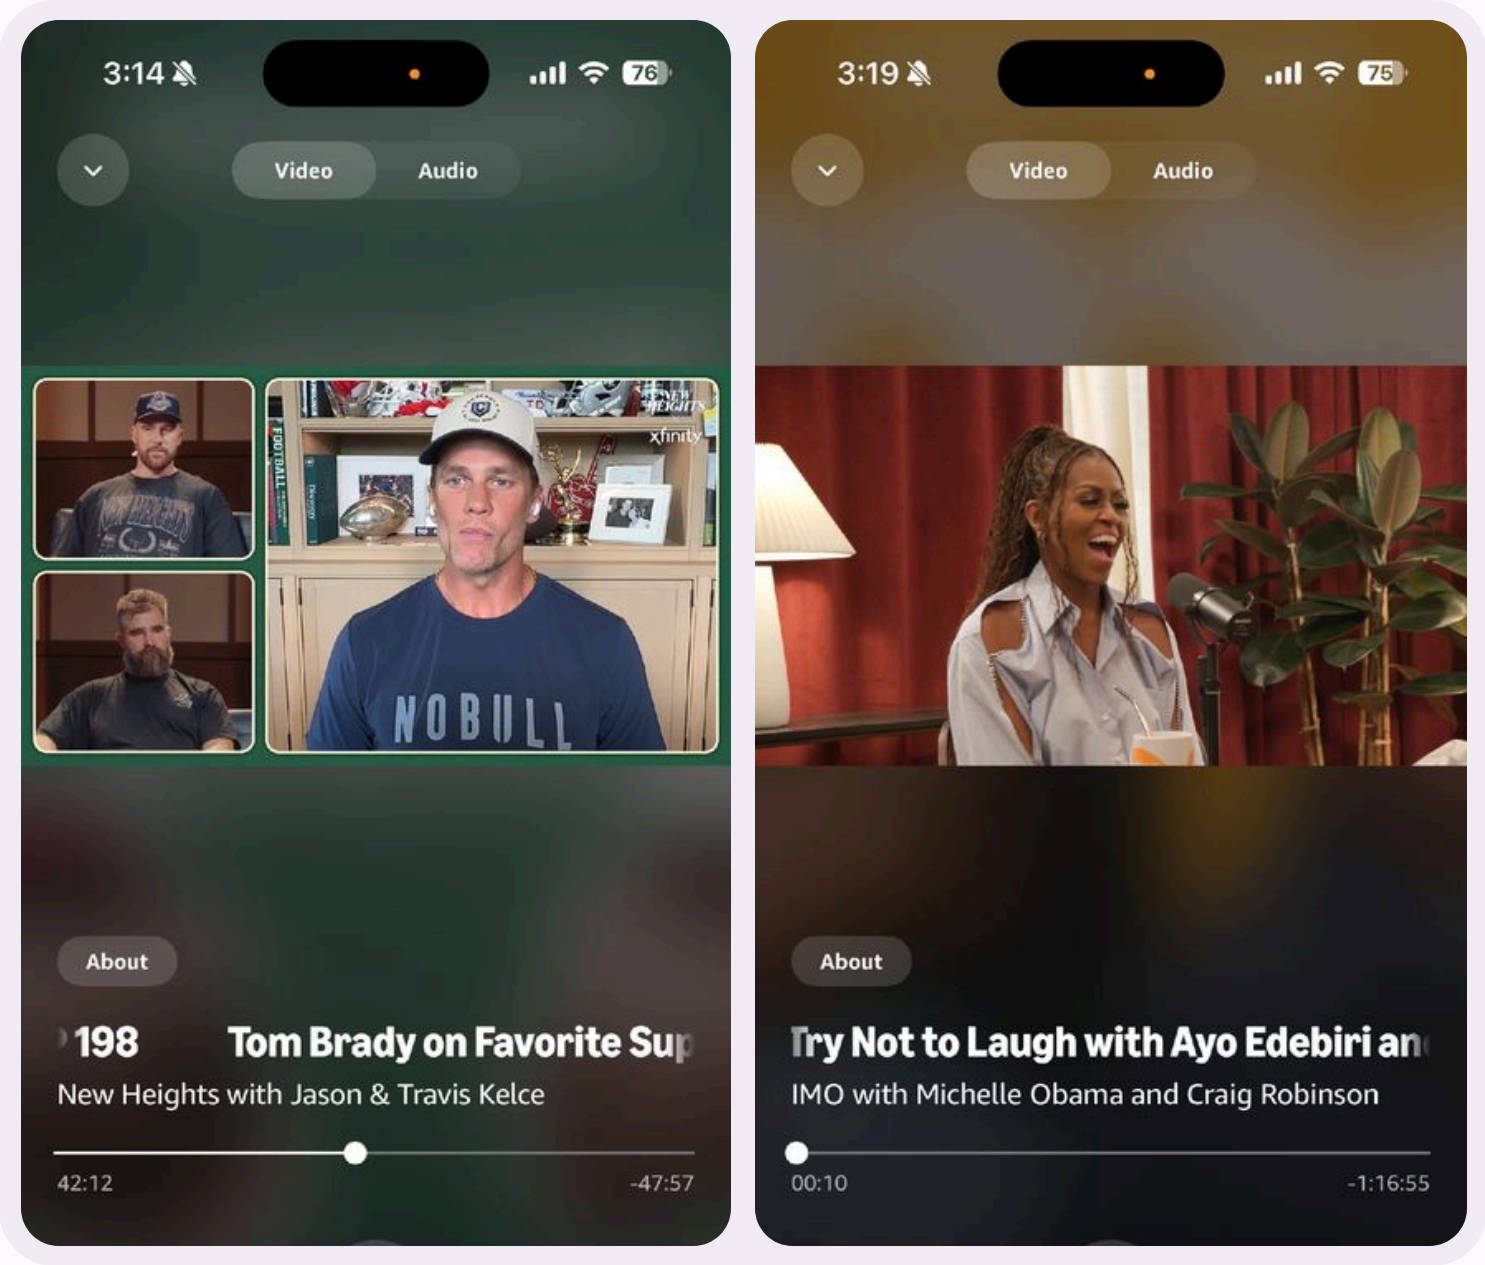

Video is coming to Amazon Music.

A new place for people to watch your show, and the marketing that comes with it.

Your show, inside an app people already open every day.

Amazon Music is about to start showing video podcasts.

If you already publish video through Flightcast, your episodes will be there automatically. There is nothing separate to upload.

This is how a video episode looks to someone on Amazon Music: they can watch your show, not just listen to it.

Four ways to put your show in front of more people.

Flightcast can get you into the marketing that comes with it.

Amazon is opening four programmes, and we think yours is one of the shows that fits.

01 **Times Square billboard**
One week · 3 to 4 months lead time

02 **Featured in the app**
Quickest · Nothing promised back

03 **Audio ad swap**
Ad space for reach · No money changes hands

04 **Paid social ads**
Amazon funds Meta and TikTok

01 · THE BIG ONE

A billboard in Times Square

A week on one of the world's biggest screens, plus a shoot you keep.

01

7 days

Full-screen video at 20 Times Square.

Best for shows with a big audience already.

- 01 A one-week feature on Amazon Music's billboard at 20 Times Square.
- 02 Professional photography and video, yours to use on social.
- 03 A featured spot inside the Amazon Music app.
- 04 Amazon's ad spend behind the files you provide, as part of the social ads programme.

Previous Amazon Music features are shown on the preceding slide.

Bring your audience to Amazon Music.

Five commitments, each with a clear reach target.

Website

A button or link on your site pointing to your show on Amazon Music.

750,000 plays

An ad at the start of your episodes, naming Amazon Music and no other platform.

100,000 impressions

A display banner campaign linking to your show on Amazon Music, seen at least 100,000 times.

250,000 followers

One Instagram feed post tagging @amazonmusic, using shoot photos. The posting account needs at least 250,000 followers.

100,000 people

An email to at least 100,000 people, pointing to Amazon Music and no other platform.

Then bring the campaign to life.

The source files Amazon needs to make the work.

VIDEO	A video of you, 15 to 30 seconds, talking about the show.
PORTRAIT	An approved headshot Amazon can use to build a still image ad.
COVER ART	3000 × 3000 pixels, JPG, or MOV if you want it to loop.
COPY	A tagline, 40 characters or less.

Featured in the app

Reach people who are already browsing Amazon Music.

02

A place in the browsing experience.

Amazon can put your show at the top of a page or on a themed list.

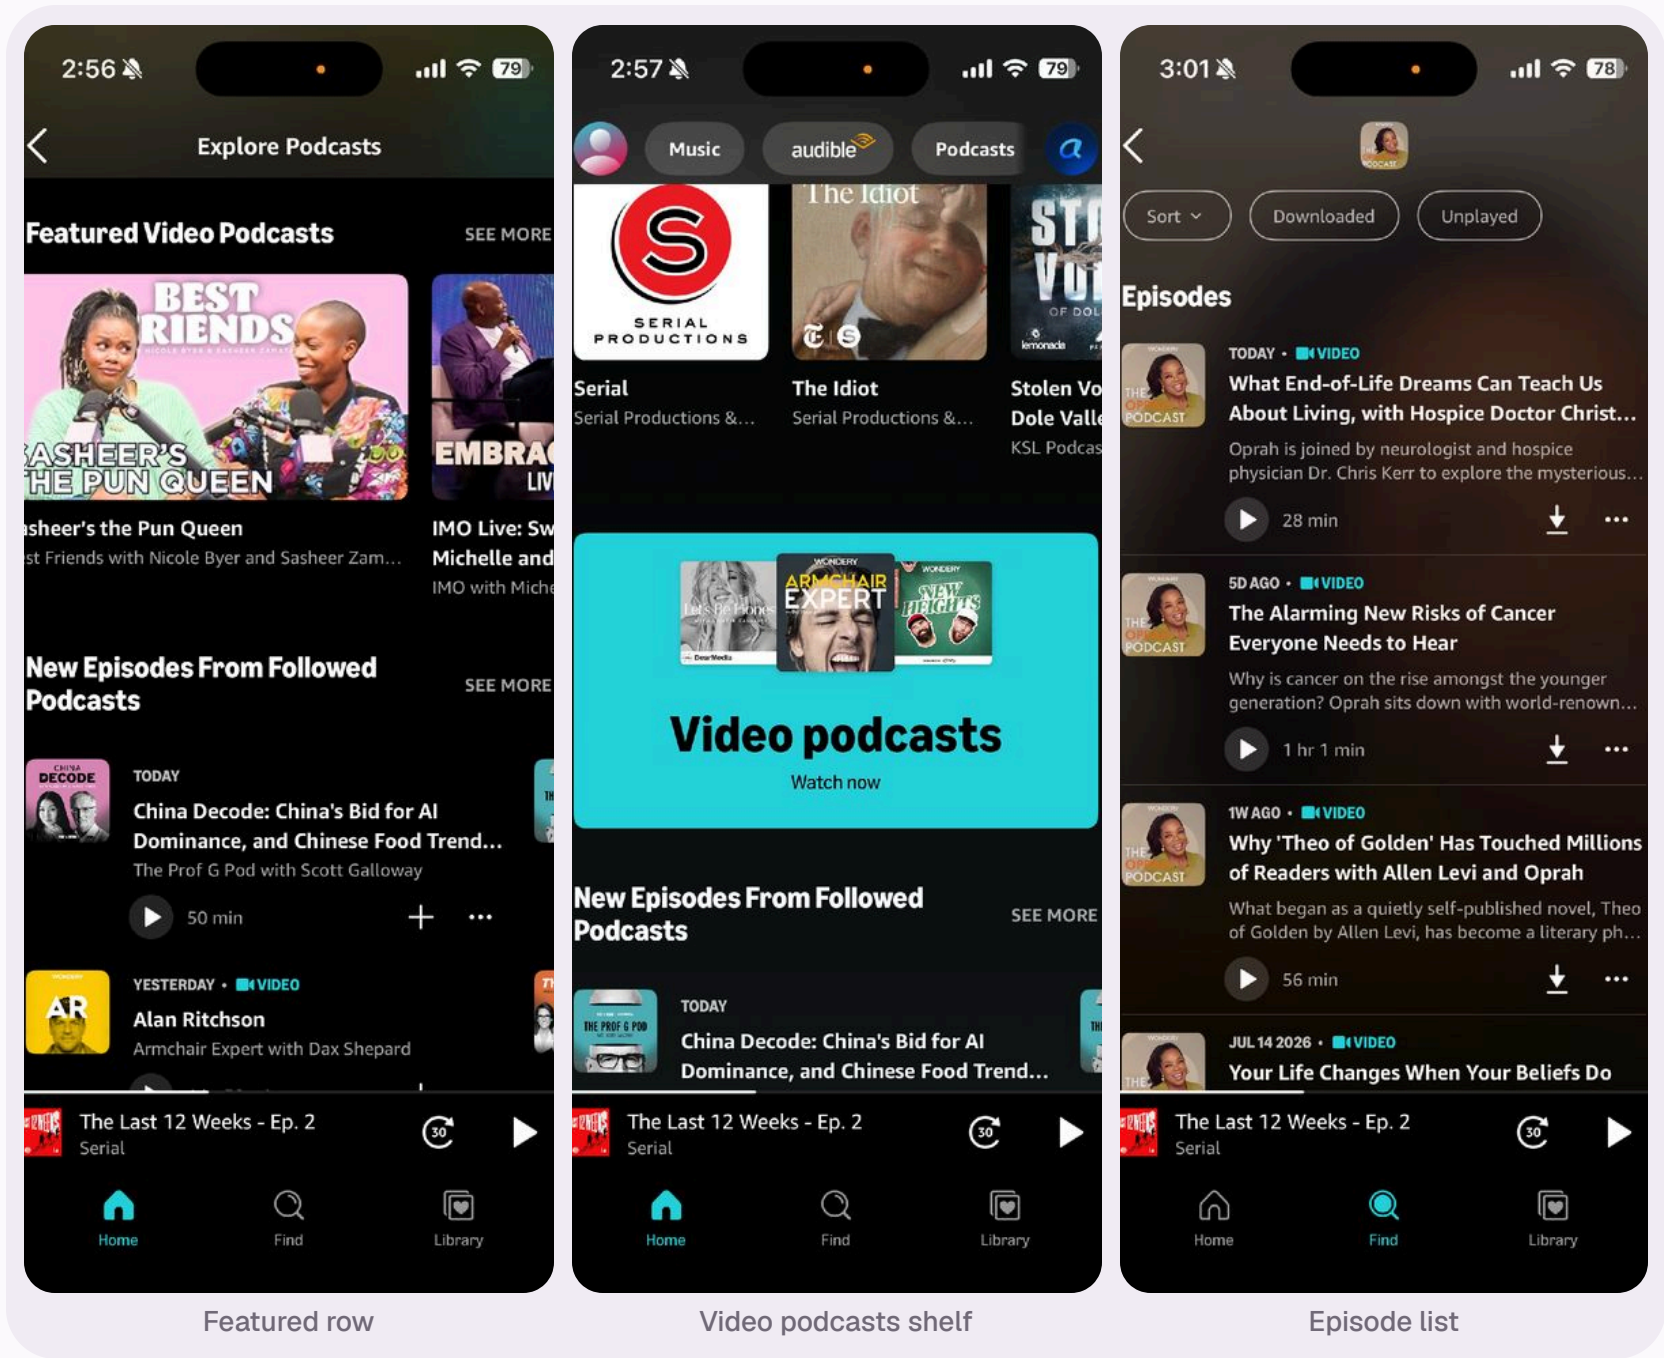

Prominence is Amazon's call, based on audience size, show quality and fit with what the team is pushing at the time.

What they want back

Nothing. You are not promising anything for this one.

REQUEST THE FEATURE

Amazon partner promotional request form

Swap ad space with Amazon Music

Trade ad space you already have for reach you could not buy.

03

Your audience unlocks their free-tier audience.

WHAT YOU GIVE

2 million

An ad telling your listeners the show is on Amazon Music, played 2 million times across your episodes.

WHAT YOU GET

Ads across Amazon Music's free tier

Including people who have never come across your show.

Nobody pays anybody. It is ad space for ad space.

Record once. Run to 2 million.

How long that takes is down to your download numbers.

01

Record an audio ad pointing listeners to your show on Amazon Music.

02

Run it in your episodes, like any other ad, until it has been played 2 million times.

03

Amazon runs ads for your show to people using its free tier.

04

No invoice either way. The exchange closes in ad inventory.

A show doing **100,000 downloads an episode** gets there faster than one doing **10,000**.

Paid social, funded by Amazon

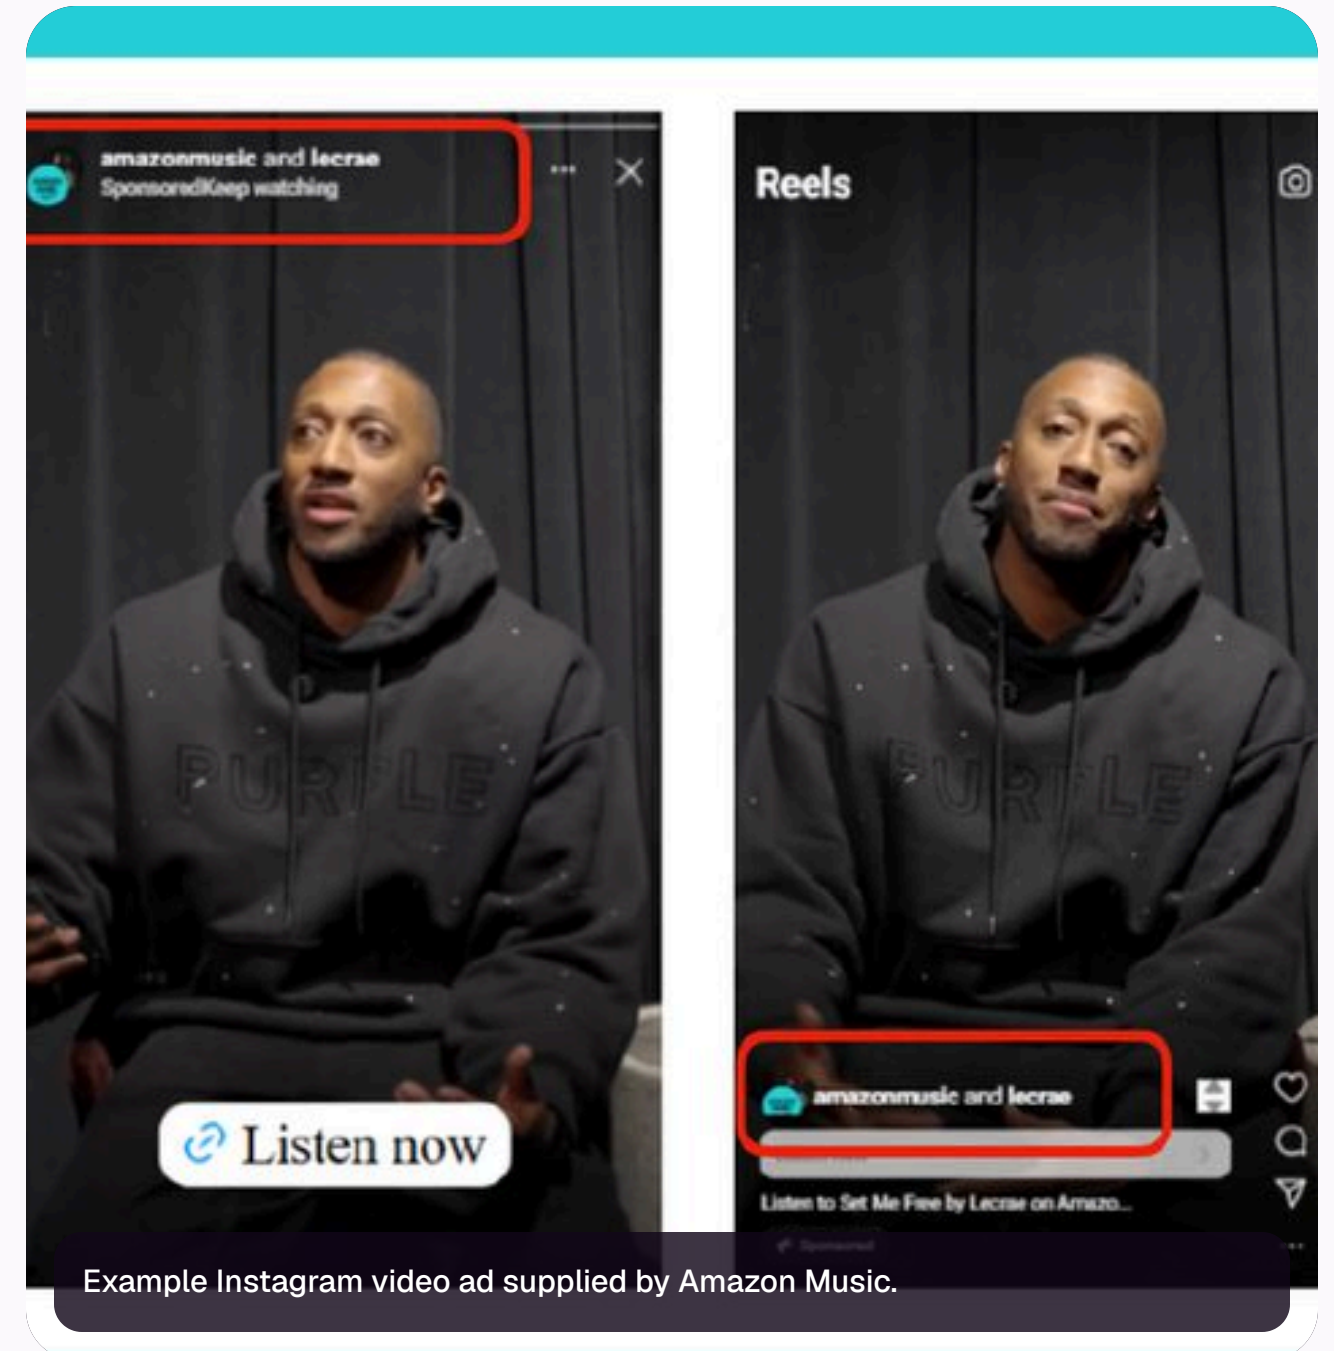

You provide the host and show assets. Amazon provides the media dollars.

04

Send the files. Amazon funds the reach.

Amazon distributes and boosts partner-provided video and static assets across social media, at no cost to you.

Every ad drives back to the podcast on Amazon Music, growing awareness for both the show and its host, plus discovery and engagement on the service.

Example Instagram video ad supplied by Amazon Music.

More reach. Still recognisably yours.

Ads are disseminated from both your handle and Amazon Music handles.

They reach more people, maintain authenticity and do not clutter your own feed. Every ad links back to your show.

BUILD

Amazon Music creates ads from your assets.

DISTRIBUTE

Amazon runs them across TikTok and Meta platforms; platform instructions are linked in Amazon's process.

META ELIGIBILITY

A professional or business Instagram account is required for Instagram and Facebook.

TIKTOK ELIGIBILITY

Any TikTok account works. All TikTok accounts are eligible.

Three routes into the campaign.

You can provide more than one.

01

Host-led videos

Speak straight to camera in a style that feels natural to the show.

15 TO 30 SECONDS

02

Static assets

Send one approved high-resolution headshot. Amazon builds the ad.

ONE APPROVED PORTRAIT

03

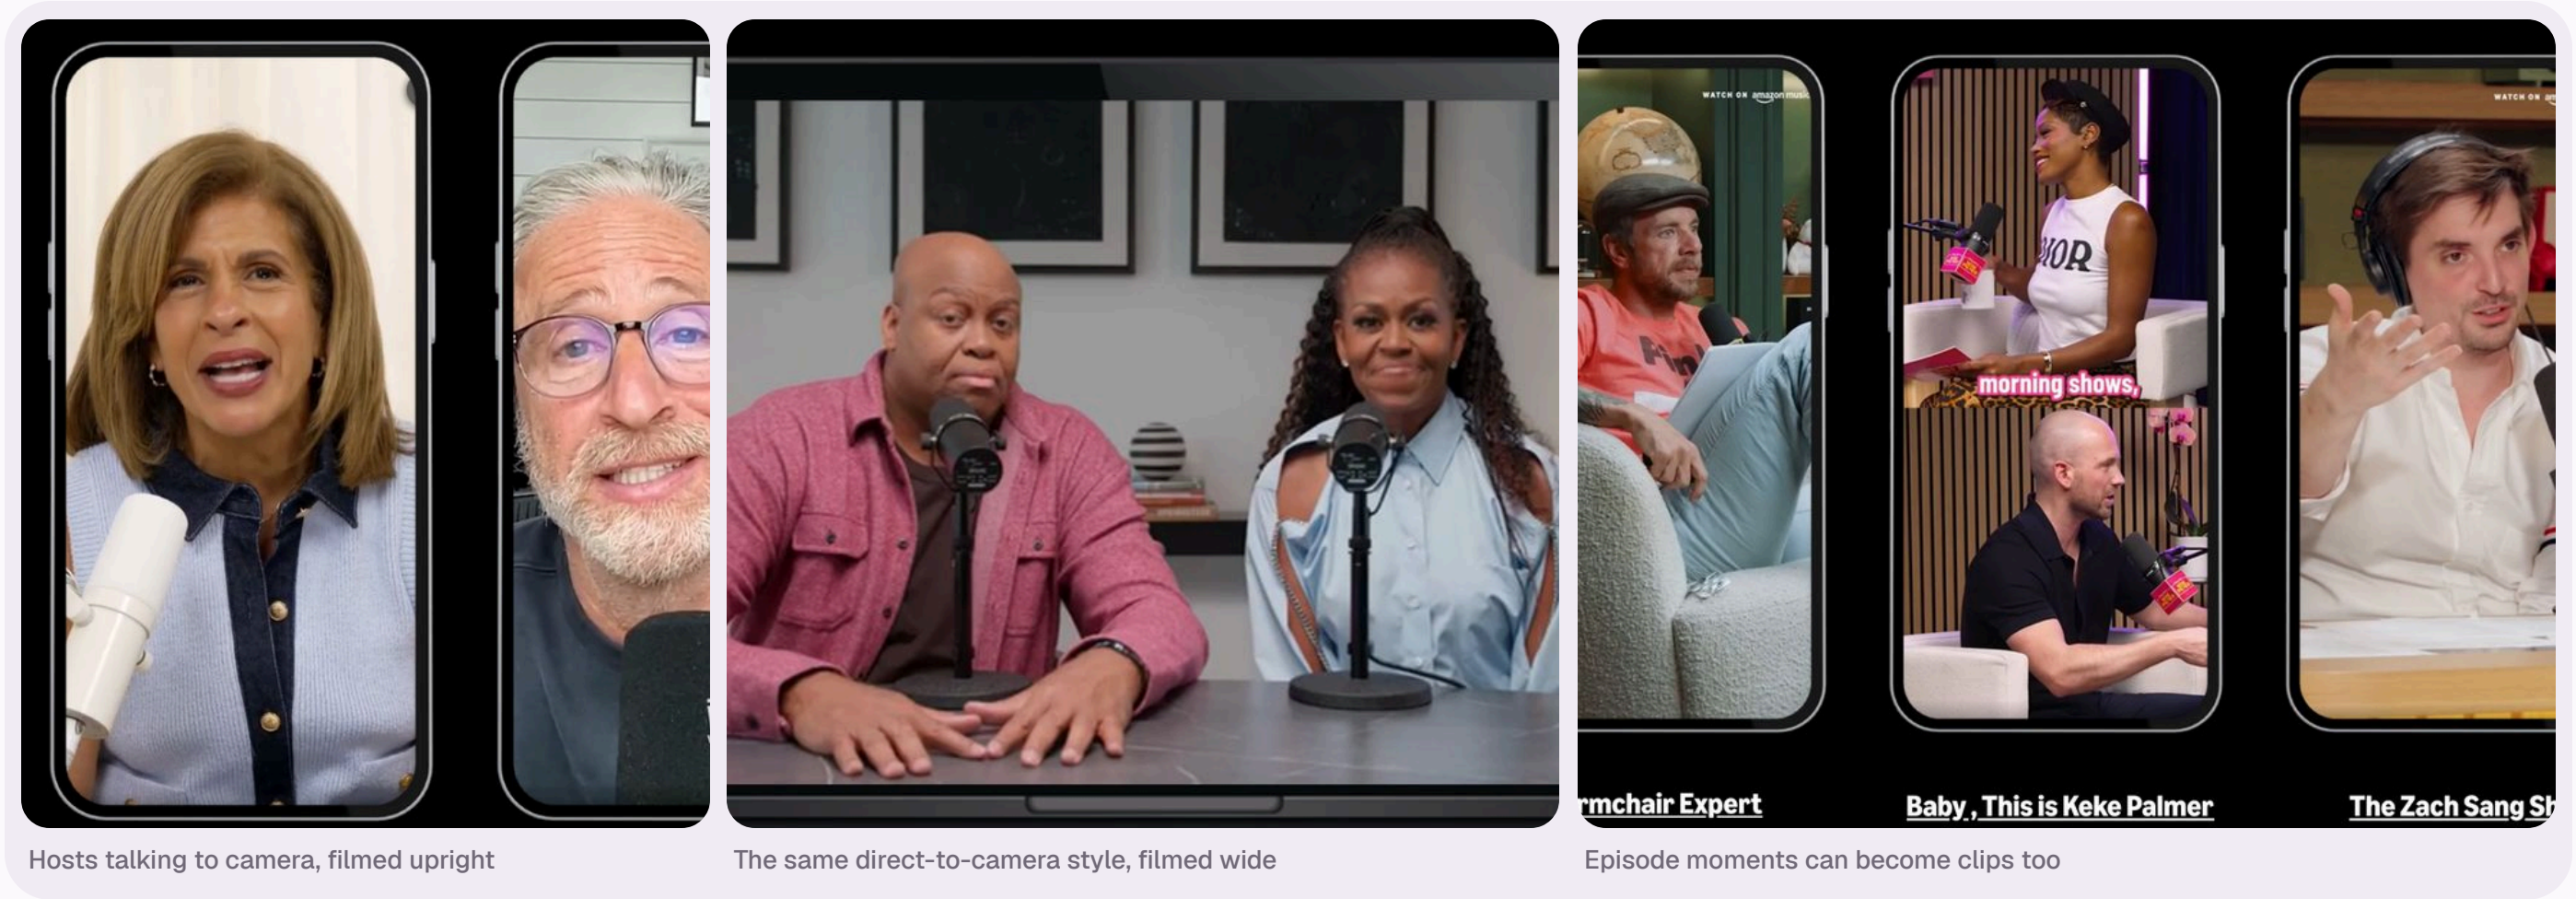

Episode clips

Use a strong moment from a video episode already on Amazon Music.

30 SECONDS OR LESS

Connect with fans where they are watching.

Host speaks straight to camera. Upright, wide or square can all work.

Amazon source examples: Joy 101 with Hoda Kotb · The Weekly Show with Jon Stewart · IMO with Michelle Obama and Craig Robinson · That Was Us Podcast.

A simple script in three moves.

- 01 **Introduce yourself.**
- 02 **Introduce the podcast:** what it is about, key conversations, or a story that hooks a new listener. “Have you ever wondered...?”
- 03 **Keep it evergreen.** Do not mention specific episodes or guests.

Look and feel

Use a clean background and steady shot. Not handheld and not a selfie. A mic and headphones in frame work well.

“Listen to the podcast now on Amazon Music!”

Audio-only call to action

“Watch the podcast now on Amazon Music!”

Video podcast call to action

LENGTH

15–30
seconds

15 to 30 seconds long, under 500 MB.

Keep the production
clean, not complicated.

File size

Within 500 MB.

Aspect ratios

9:16, 16:9 or 1×1.

Captions

Please include subtitles if possible.

End card

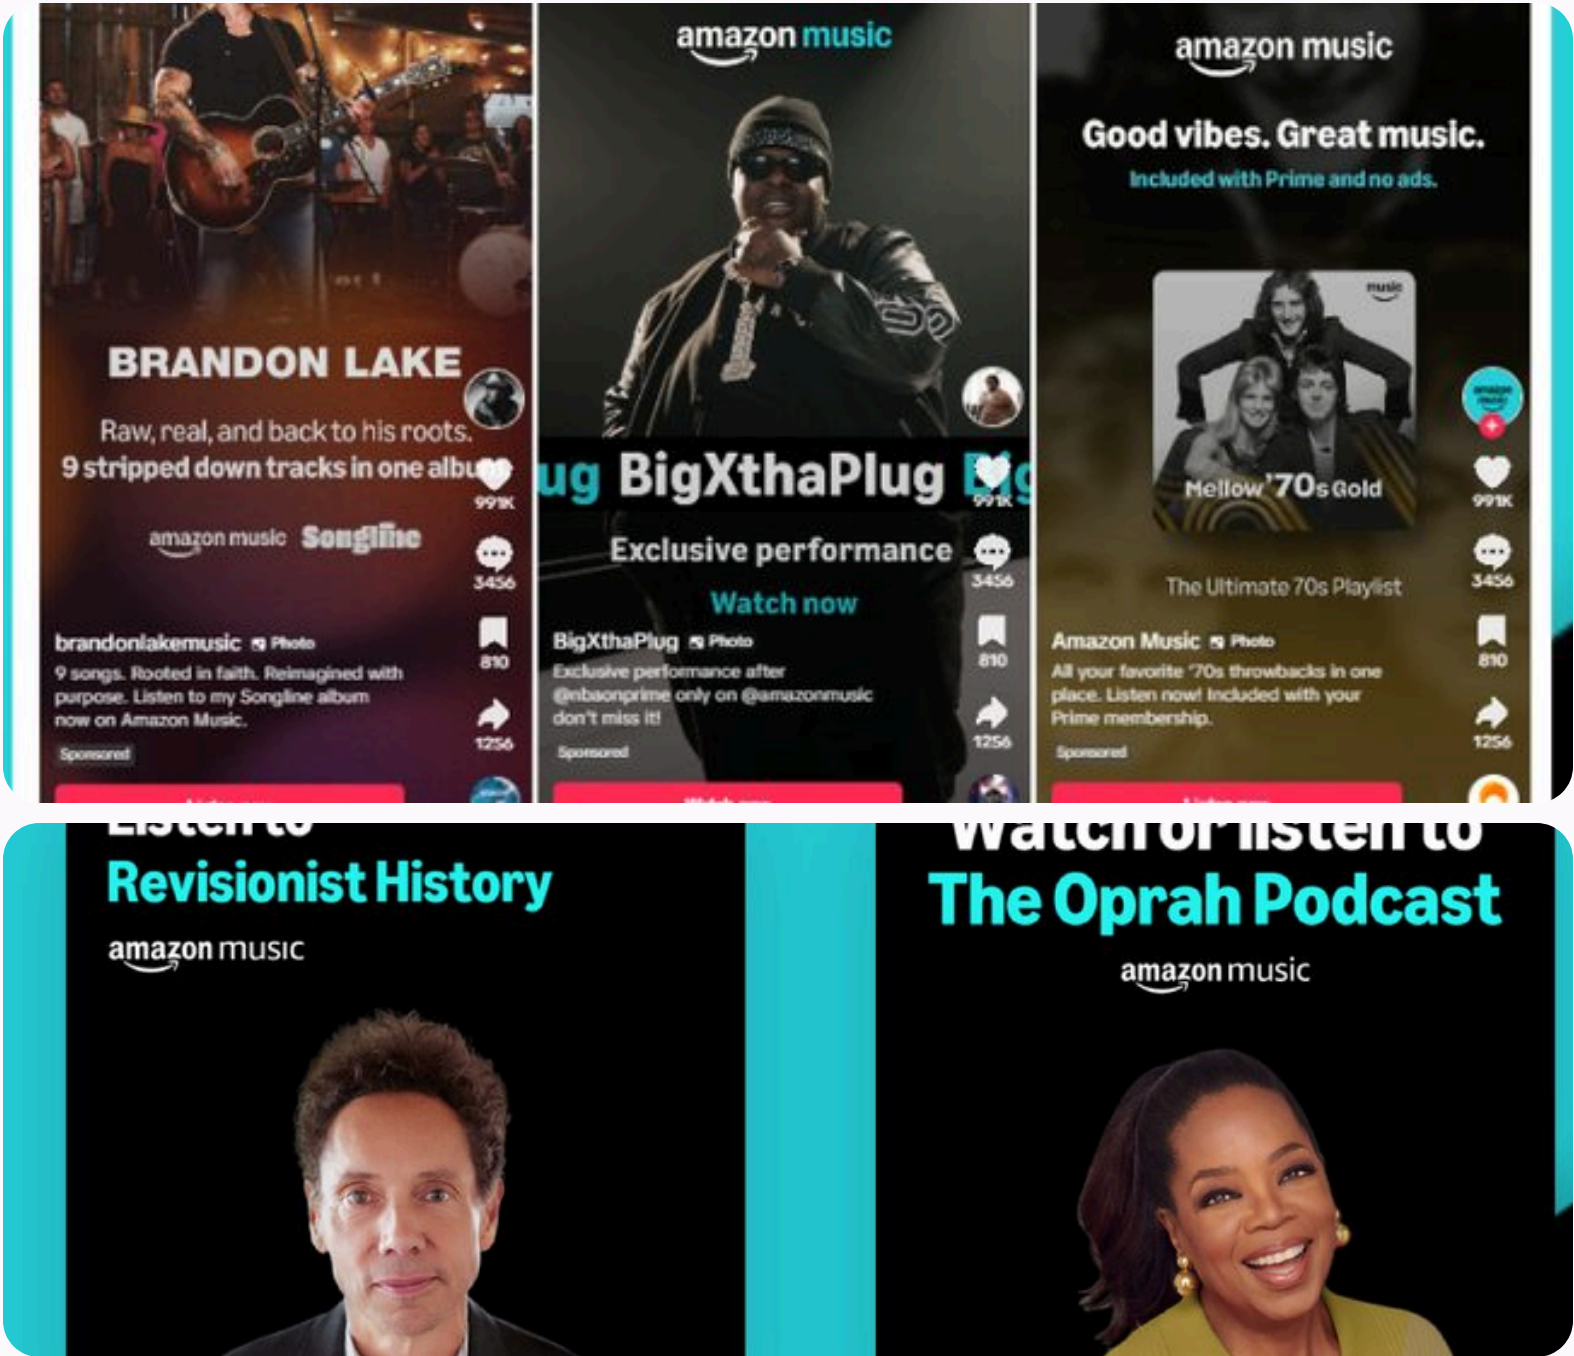

Added by Amazon Music.

One portrait. Amazon builds the ad.

Send an approved high-resolution headshot.

Amazon creates a static asset around it and links directly to the podcast on Amazon Music.

Source examples: Malcolm Gladwell and Oprah Winfrey. Examples are not part of this offer.

No need to film anything new.

Use a clip you have already posted.

It must be 30 seconds or less and pulled from a video episode currently on Amazon Music.

A strong moment gives potential viewers a taste of your content and tone.

Source examples: Armchair Expert with Dax Shepard, Baby, This is Keke Palmer, The Zach Sang Show and That Was Us Podcast.

Within a week

Usually live after receipt.

4 to 6 weeks

Typical initial campaign.

Up to 3 to 6 months

Extendable if performing well.

Where does it run?

Facebook, Threads, Instagram and TikTok.

Will it be seen?

Yes. Every piece delivered goes live in market and gains impressions.

How often should we send?

No specific cadence is required; 1 to 4 a month is preferred.

Do we get conversion data?

No. Conversion details cannot be shared under Amazon Music policy.

What can we send?

Host-led video, static portraits and episode clips. Send all three where possible.

What happens after delivery?

Amazon creates, distributes and pays for the media. Everything you send gets run.

NEXT STEP

Worth a short call.

Fifteen minutes to work out which programme suits your show, where your audience is now and where you want it to go.
